

Naples, 30th of May 2017

“The reopening of Scampia Metrocampania Nord East construction site is a remarkable event for the city, for Neapolitans and for our company.”

These are Roberto Passalacqua’s main remarks (the Vice President Region railways & Mass Transit of Ansaldo STS), pronounced during the event which took place on the 30th of May 2017 in Naples (Italy). The ceremony has been attended also by Claudio De Vincenti (Italian Minister for Territorial cohesion and the South), Vincenzo De Luca (Governor of Regione Campania) and Umberto De Gregorio chairman of the Board of directors of EAV SRL.

“This line represents the first segment of the Metropolitana Regionale (formely known as Metrocampania Nordest), which will connect the city of Naples with the Northern side of the region – explains Passalacqua –. The line will guarantee the connection between Aversa and, for instance, the international airport of Capodichino in Naples. I am more than confident that thanks to new service the quality of life of many Neapolitans will improve.”

Among the other goals of the projects are also the creation of a pedestrian square in Scampia (Northern district of Naples) and a roundabout. At the design stage are the metro stops of: Miano; Secondigliano; Regina Margherita; Di Vittorio; Capodichino Aeroporto (all belonging to a different tender). The members of the temporary grouping (or ATI in Italian) are: Ascosa Ferroviaria (emissary) and Ansaldo STS, Aet, Imeco Ldb e B&P.

= Alifana inferiore : tratta in esecuzione

= Alifana superiore : tratta in esecuzione

= Tratte da costruire
